

EMBRACE THE **MUD.** EMBRACE THE **DEBRIS.**

SITE DRAINER™
WON'T.

PICTURED: SD 300

**MEET THE ONLY
NON-CLOGGING ELECTRIC SUBMERSIBLE DEWATERING PUMP.**

PATENTED TECHNOLOGY

Site Drainer's™ patented "free flow design cylinder" technology¹ is unlike that of any other electric submersible dewatering pump on the market. Where other pumps will fail, Site Drainer™ allows the water to continue to flow freely even after a solid particle barrier is created.

It simply will not clog.

LIMITLESS APPLICATIONS

Mud, debris, gravel, sediment or sludge. You name it, Site Drainer™ can handle it. Site Drainer™ can work in virtually any environmental condition without contributing to erosion, which makes it environmentally sound. From flooded construction sites to flooded basements - **it works before, during and after the problem.**

SUPERIOR PERFORMANCE

Site Drainer™ is manufactured using corrosion resistant material and will not clog or run dry. It requires no assembly, tools and very little maintenance. With an automatic shut-off feature, it uses 90% less energy consumption than standard electric submersible dewatering pumps, which makes it an economical solution that is **built to last.**

DESIGNED & ASSEMBLED IN U.S.A.

NO TOOLS REQUIRED

NON-CLOGGING

SITE DRAINER
THE NON-CLOGGING SOLUTION.

¹U.S. patent no. 8,636,898. Other U.S. and foreign patents pending.

SITE DRAINER
THE NON-CLOGGING SOLUTION.

1/2 H.P.

**115 Volts
@ 60Hz**

5.09 AMPS

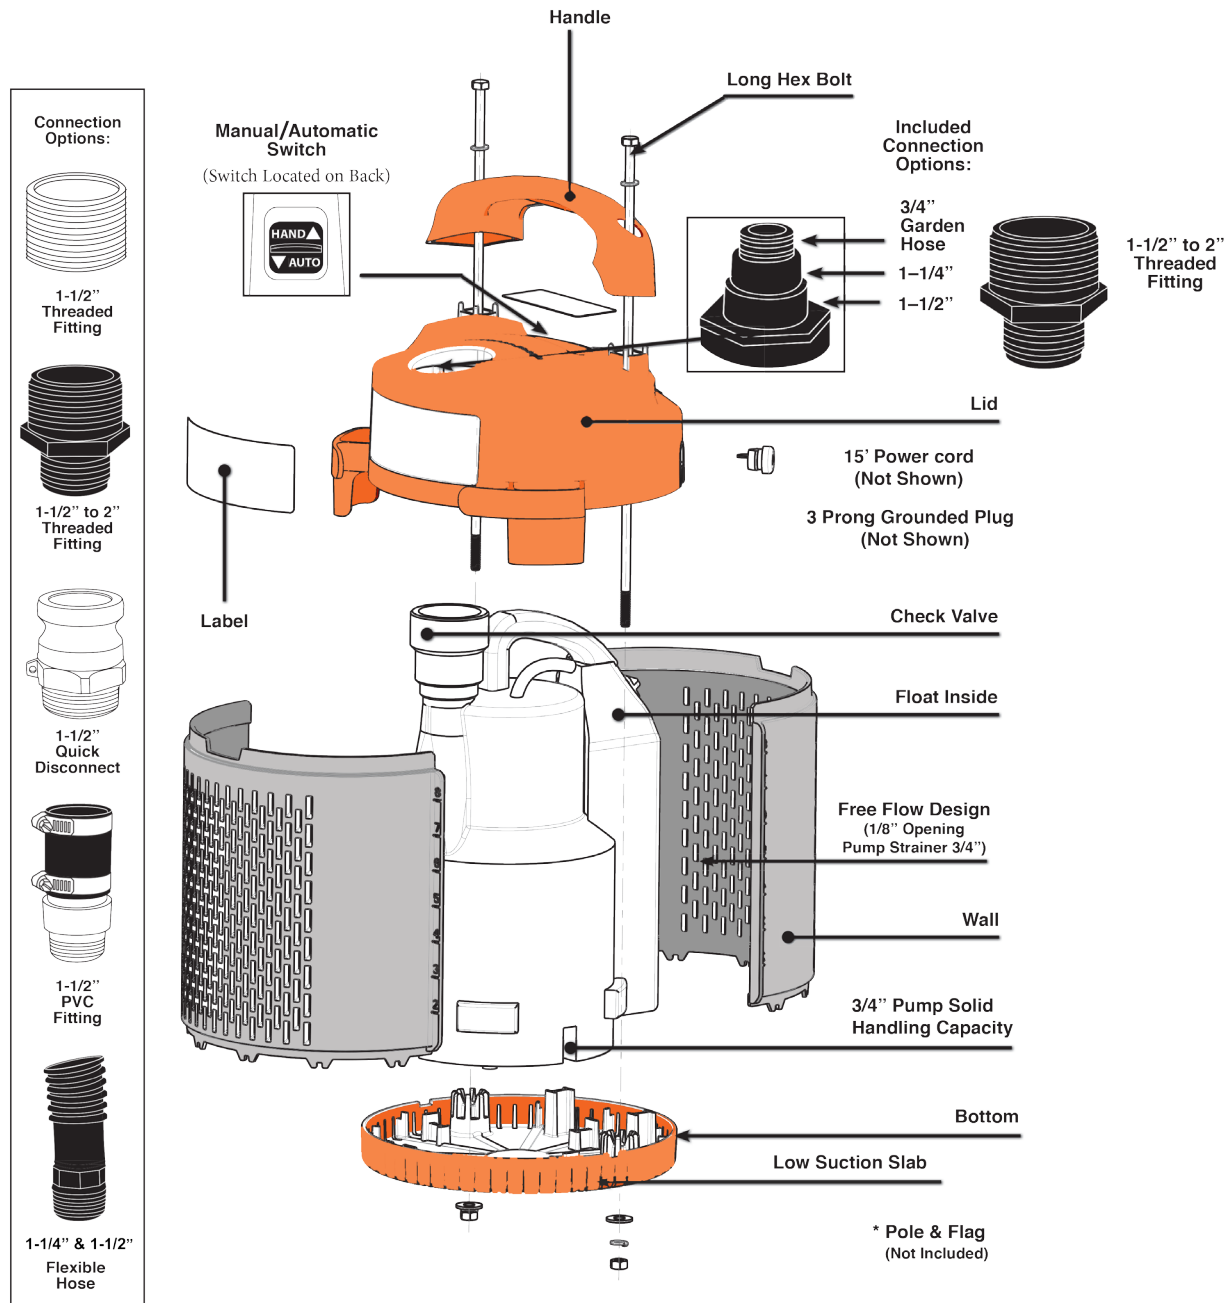

Single phase

**3/4" - 1 1/2"
discharge**

14.2 lbs.

BE PREPARED FOR JUST ABOUT ANY RESIDENTIAL OR COMMERCIAL WATER REMOVAL NEED WITH WORRY-FREE PERFORMANCE.
