

# ZVL Ball Bearings

9.02.14

## Why use ZVL Ball Bearings?

- Excellent European quality bearings at a competitive price.
- ZVL uses a method of roll forming the bearing raceways which produces a work hardened surface, thereby increasing the strength of our bearing rings over traditional machining operations. Both SKF & the Japanese bearing manufacturers have visited ZVL plants to view this technology.
- Inner and outer raceways are ground and honed to achieve a precise surface finish.
- ALL bearings are 100% noise checked to industry standards.
- Grade #10 balls are utilized.
- Sealed bearings are pre-packed with Chevron SRI #2 grease which is a widely-known and accepted grease in the electric motor industry. This grease is primarily noted for its high speed characteristics and low noise operation.
- Bearings are available in a C3 fit as sealed, shielded, or open.
- All bearings are designed and manufactured in accordance to ABMA and ISO standards.

---

~ Produce bearings for several major automotive manufacturers all over the world.

~ Supplying ball and tapered roller bearings to Allison Transmission Division for almost two decades with 100% on time delivery and zero defects.

~ Major ZVL accounts around the globe: Volkswagen, Skoda, John Deere, Daewoo-Avia Trucks, Tatra Trucks, Caterpillar, SEW Eurodrive, Siemens, General Electric
